ABOUT US - MARCONIO WELLNESS CONCEPT

A segment of the Company Marconio Whirlpool SPA which is dealing with wellness, manufactures all their products from the finest materials and components of world-class manufacturers with the full commitment to our employees. Our imperative is to satisfy our clients' wishes and make all their senses enjoy while using our products. Basic principles such as functionality with high performance, durability, design and constant technological progress are our top priorities. All the better understanding of wellness by clients who know what they want demands from us to move forward and design wellness facilities that are aesthetically perfect and in the first place of good quality. Within the framework of our products range, we have made division into home – private wellness and professional – public wellness, so the clients can easily recognize their needs and wishes. Marconio assortment is huge and includes all the facilities necessary for a modern equipped SPA center from the basic wellness equipment to the most luxurious SPA facilities that would satisfy even the most demanding clients. Take a peek at our wellness corner and realize your professional ambitions or create wellness in your own home.

DESIGN

If the client chooses Marconio wellness products, we have to offer a free wellness center design solution made by our architect who is specialized in wellness centers. We can also help and give suggestions when it comes to choosing wellness equipment and the materials which will make your SPA center regarding to its size and space itself. Besides, we also provide technical support during the execution of the necessary installation works for all the selected contents. First, we create 2D conceptual design of a wellness zone with visualization of individual content in accordance to the basic design of the SPA center, after which we discuss about the details with an investor so that we can reach a final decision, which is then mapped in 3D renderings. In this way, our clients get a very realistic picture of their future wellness center. Whether it is a private wellness zone or a public SPA center, our team will strive to create wellness center which is embodiment of your style and to assume a unique stamp of our clients. Our employees, who are the greatest wealth of our company, have an abundant technical, technological and design experience, therefore we have managed to conquer a position in a very strong competition in a short time.

MARCONIO WELLNESS CENTAR

Company Michel Ltd. is the only in this region which has its own wellness and SPA center called Marconio Wellness. Unique curiosity is that all our potential customers can directly try any wellness content that our SPA center has. In this way, we demystify wellness concepts to our clients, we give them a tangible sense of each product, we direct and define their wishes and needs whether it is about a home SPA center or wellness intended for public use. Our clients can enjoy in wellness center, while the amount of money they paid is being refunded in case they opt for our company as executor of their wellness center or any individual contents. With this step, Marconio offers its clients the opportunity to experience all the wellness facilities, feel each individual effect, feel the materials, and give their suggestions. In this way, by common constructive dialogue, we come to achieving your goals.

SAUNAS

Therapeutic importance of sweating is known since the ancient times as a very efficient way of purifying the body. Beside the beneficial effect on the skin of the face and body, your organism frees itself from toxins and becomes more vital and resistant to viruses. At high temperatures, blood circulation increases, muscles relax, so there is no better way to finish a tiring day, while relaxing your body.

FINISH SAUNA

Temperature: 80-110 ° C
Environment: humidity: 8-15%
Material: wood abachi, Finnish white pine, cedar, hemlock, aspen
Effects: stimulates circulation, flushes toxins, strengthens the body

Benefits of Finnish sauna are well-known, and they include all positive effects on human psyche, regenerate and relax the entire body. It helps in prevention of respiratory diseases, allergies and problematic skin, also increases durability of entire body. The heat stimulates blood circulation and sweating, thus increasing the activity of the sebaceous glands which expel toxins through sweat. The interior of the sauna is made of the highest quality wood: abachi, cedar or Finnish white pine without knots, while the benches, backrests, and guardian stove are made of African abachi wood. Upon client's request, Finnish sauna may include additional options such as: light therapy, starry sky, bio-sauna with aromatherapy, music system or walls made of Himalayan salt blocks, which adds special charm to the sauna.

INFRA-RED SAUNA

Temperature: 45-55°C
Environment: humidity: 8-15%
Material: wood abachi, Finnish white pine, cedar, hemlock, aspen
Effects: body detoxification, discharge of heavy metals from the body.

Infra-red saunas are supplied with infra-red heaters which produce sun-like beams, but without ultra-violet rays. Unlike traditional saunas, which heat the body via air or steam, infra-red sauna achieves many benefits with its warm rays. Rays directly penetrate the skin in form of radial thermal energy with penetration depth of 2 to 10 mm.

BIO SAUNA

Temperature: 55-60°C
Environment: humidity: 45-55%
Material: wood abachi, Finnish white pine, cedar, hemlock, aspen
Effects: improves the immune system and relieves stress, beneficial effects on skin.

Bio sauna is lighter than traditional Finnish sauna. The temperature is lower, while air humidity is higher. Instead of classic sauna furnace, there is a combined one, which includes steam generator. Therefore the bio sauna is suitable for various types of scents, creating a deeply relaxing ambience. Bio sauna can effectively combine light therapy and relaxing music in order to achieve the state of complete well-being of mind and body.

STEAM BATH

Hamam, Turkish bath or Roman bath have been known since ancient civilizations. These are rooms filled with steam, high humidity, where the benches are heated so that a gentle heat relaxes entire body. Steam baths are extremely attractive content since they are usually made in mosaic, while its ceiling is made of arch or dome. It positively affects the skin, respiratory system, stimulates the immune system and reduces stress.

HAMAM

Temperature: 45-55°C
Environment: humidity: 90-100%
Material: extruded polystyrene (EXP), mosaic, tiles
Effects: skin cleansing and positive effects on the respiratory system.

We have been learning from Arabic hamams, Turkish and Roman baths, and with our technological and design innovations we created a perfect place dedicated to the care of your body and mind. For its lower average temperature, some find it more pleasant than the traditional Finnish sauna. Steam baths have a positive effect on the respiratory system, they reduce pain in rheumatic diseases, have a beneficial effect on your skin. The heart of the steam bath is a steam generator, selected according to the cubic volume of the space. Steam baths are ideal for different types of aromatherapy, which contribute to the total well-being of mind and body. Marconio steam rooms are designed to provide a higher level of quality through careful selection of materials.

LACONIUM

Temperature: 55-60°C
Environment: 100% with injecting saline aerosols
Material: extruded polystyrene (EXP), mosaic, tiles
Effects: stimulates power of the immune system and relieves stress.

Laconium is a dry room for sweating. Mild heat radiates from the floor, walls and anatomical seats. The floor and the benches have integrated heating cables which are heated to about 40°C, while the walls are heated to about 70°C. In this way is created the environment where users slowly sweat and thus expel toxins from the body; it has a positive effect on blood pressure. In final building is mostly used mosaic, ceramic, marble or granite.

STEAM BATH WITH HALO EFFECTS

Temperature: 37-45°C
Environment: humidity of about 100% with the insertion-spray saline
Material: extruded polystyrene (EXP), mosaic, tiles
Effects: positive effects on the skin and entire respiratory system.

Salt steam bath is a steam zone, characterized by a special device for injecting saline into the room. The device creates the effect of sea climate and has a positive impact primarily on the respiratory system of the user. The devices are produced by a well-known German manufacturer for dosing systems, WDT.

POOLS

Company MICHEL is engaged in the complete design, construction, technical equipment and maintenance of indoor and outdoor swimming pools, whether for private or public use. Our partners are the most famous world manufacturers of swimming pool equipment: Astral pool, Dinotec, BWT, Bencheke, Speck... We pay special attention to filtration and treatment of water at public swimming pools in order to meet rigorous standards. Our electricians construct command electrical equipment, depending on individual wishes of our clients. Thus, among other things, we also build IG smart pools which can be controlled from your smart phone. MARCONIO is the only company in the region where our clients, within Marconio showroom, can not only see but also try one of our pools and other wellness facilities. Take a look at our technical room, technique and finishing of mosaic in our showroom.

FLOTARIUM – SOBE ZA PLUTANJE

Plutanje kao novi vid wellness-a postaje sve više popularno posebno kod kategorije zahtevnih klijenata koji wellness poznaju jako dobro. Koncept se zasniva na tome da se oponaša specifičnost Mrtvog mora, a to znači da 30% vode u plutajućem tanku čini magnezijum sulfat (MgSO4). Na taj način telo pluta u bestežinskom stanju i opušta se u okruženju sličnom kao kada smo se nalazili u majčinoj utrobi. Plutanje jeste jedini pravi vid čiste relaksacije i opuštanja svakog mišića, pa samim tim i uma. Studije su pokazale da je 1h plutanja ekvivalent za 4h spavanja. U samoj prostoriji dimenzija 250x200 nalazi se akrilna kada za plutanje sa sasvim dovoljno mesta za dve osobe. Kada je izrađena od sanitarnog livenog akrila, što obezbeđuje higijenu na najvišem nivou. U enterijeru koji je dopadljivo urađen, nalaze se i sistemi za aromaterapiju, hromoterapiju, muzički MP3 sistem. Ono što predstavlja srce plutajućih soba jeste tehnička prostorija. U njoj je smešten kompenzacioni tank i filtracioni sistem. Maksimum higijene i najbolji mogući tretman vode su prioritet MARCONIO soba za plutanje. U koliko nema korisnika u periodu od dva sata, dezinfekcija vode se automatski pokreće. U cenu je uračunata i 3D vizuelizacija prostora, koju radi naš arhitekta specijalizovan za wellness, naravno u dogovoru sa investitorom.

MARCONIO MASSAGE POOLS

Temperature: 35-39°C
Environment: a combination of hot water with hydro massage
Material: sanitary cast acrylic
Effects: total relaxation of muscles and body.

Marconio massage pool use symbiosis of warm water, different types of nozzles and powerful engines to maximize the effect of hydro massage and relax body from feet to neck muscles. Marconio Whirlpool SPA is the only producer of massage pools in Europe when it comes to professional relief massage pools designed primarily for public facilities. Hydro massage pools are ideal in combination after relaxation of body lying in tepidarium, after which muscles are completely relaxed and ready for massage treatment. Massage pools can be used all year round in all weather conditions. We can distinguish overflow massage pools and hydro massage hot tubs, with some differences when it comes to filtration and frequency of people using them.

SALT ROOMS

Temperature: 25-30°C

Environment: humidity: 40-50%

Material: Himalayan salt blocks, Dead Sea salt

Effects: treatment of respiratory tract infection, asthma and bronchitis, allergies and skin diseases.

From the historical point of view, it can be said that the healing properties of salt rooms and salt caves has been used for centuries for treating of respiratory system, asthma and bronchitis, allergies and treatment of skin diseases.

One treatment in the salt room replaces four days at sea.

Conventional salt rooms and caves are built by applying salt from the Dead Sea, forming ornaments (stalactites and stalagmites), and hidden lighting contributes to special effects of such interiors. Also, into this content can be installed light therapy, music system or TV with a DVD player.

On the other hand, minimalist salt rooms, where the walls are coated with Himalayan hot bricks, with the lighting in the background are currently hit in the world. Benches can be made of African wood abachi, mosaic or salt bricks.

A very important content is recommended here – halo generator device which creates healing microclimate by dispersing dry saline aerosol of natural salt rock. Such particles penetrate deep into the skin and respiratory system, and the benefits are much greater with its use.

Marconio is the authorized representative of halo generators in the world, by Lithuanian company Halomed.

Depending on the cubic content and purpose of the salt rooms, our experts will suggest a certain type of halo generator.

We also offer nebulizers which create effect of marine climate; they spray saline directly into the respiratory system.

Nebulizers are produced in two variants: for use in steam baths and for use in dry rooms such as sauna, laconium, infrared cabin...

Halo therapy has the following positive effects on human organism:

Respiratory system

It increases ventilation of airways: it promotes bronchodilation (widens airways), causing mucokinetic effect (stimulates ciliary apparatus of mucosa and reduces viscosity of secretions), improves expectoration; it stimulates the elimination of toxins and allergens; it has a bactericide effect (destroys bacteria and fungi); it also has anti-inflammatory and anti-allergic effects.

Ear

Anti edematous effect on mucosa of the Eustachian tube (reduces swelling of mucous membranes) which enables better drainage of the inflammatory secretions, as well as aeration of the middle ear.

Skin

It has anti inflammatory and bactericidal effect, improves microcirculation, stimulates the elimination of toxins through the skin, it regulates skin pH.

HOT AND KNEIPP BENCHES, TEPIDARIA

Temperature: 37-40°C
Environment: heated loungers
Material: extruded polystyrene (EXP), mosaic, tiles
Effects: body relaxation.

The best way to fully equip a relax zone is to offer a client a number of different models of benches and loungers; Marconio, as one of the leading companies in this area can offer a large selection of them. Each model we offer has an integrated heating network of optimum strength 17w/m with digital thermostat which controls the temperature of a lying or sitting part to ideal circumference of 37-40°C. The main function of tepidarium and warm bench is to relax entire body and muscles, especially before and after using massage pools, sauna and steam bath.

Finishing is normally in glass mosaic, by client's wish. It is manufactured in several different design models. Kneipp benches are warm benches with additional foot tubs. The tubs have installed taps with hot and cold water. The tubs are filled with cold water first and then warm, so they stimulate the circulation of veins of the legs. Marconio offers a special innovation in form of Kneipp feet massage system with added automated charging and discharging. Special lines of tepidaria in our assortment are warm sun loungers by German manufacturer Sommerhuber. They have a very attractive design, thus they are a matter of prestige and a sign of a luxurious SPA.

WELLNESS ICE MACHINES

Hot and cold are two opposites that have always been attractive and have always acted very stimulatingly on the environment. MARCONIO is a distributor of German equipment for the production of ice by company ZIEGRA. This device produces ice of fine ideal temperature of -0,5C, which cannot harm the user while rubbing, therefore Ziegla ice maker is specialized for wellness centers. There are two options for the production of ice - smallest dimension 5x2-7mm and medium-sized 10-25x10-40mm. Ice maker has the option of automatic operation, which means that an ice bucket fills each time the level of ice in the container falls, because the sensor indicates it. We distinguish devices on air and water cooling, and there are also several models by the amount of ice that can produce from 3 kg / h to 16kg / h. The average ice consumption per person is 0,5-1kg, and thus there can be designed an appropriate model. The device is hidden in the ceiling, and the container is filled from the stainless steel tube which is 60cm long. The vessel which we supply can be made of stainless steel, or imitation of travertine stone.

CLASSIC AND AROMA EXPERIENCE SHOWERS

Temperature: 35-40°C
Environment: water effects in combination with aromas
Material: extruded polystyrene (EXP), mosaic, tiles
Effects: invigorating and refreshing effect on body and mind.

Showers of experience offer different variations of water effects in order to stimulate, strengthen and refresh your whole body and mind. The German company WDT is a specialist for conveyor systems and aroma experience showers. Each of the showers has several programs which can be started on specific command. Each program is a combination of water effects, side and ceiling nozzles, mist, tropical rain, RGB lighting, natural flavors and different sounds from nature. In addition to WDT showers, in our offer one can find square and circular models with or without LED lighting, as well as cord-clear with kambala wood with automatic water filling.

TABLES FOR MASSAGE AND
WET TREATMENTS

Massages are statistically mostly used SPA treatments. We recommend tables for wet treatments in extremely sanitary variants, finished in ceramic or sanitary acrylic.

Wooden tables
Model Royal is made of solid wood; it is height adjustable, while the mattress is filled with duck feathers, which guarantees a feeling of lying on clouds. This model is produced in Serbia, and has a slightly preferable price.

Ceramic tables
Special exclusive series consists of beds manufactured by German manufacturer Hilpert, with decades of tradition in the production of unique handicrafts and ceramic, and are a real masterpiece. Finishing in ceramics guarantees a uniform temperature distribution over the entire surface as well as the highest level of hygiene. Model Lithos is equipped with a manual shower channel for water drainage, and ayurvedic hanger for oil.

Acrylic tables
NeoQi Company offers Bodybase model beds for wet massage treatments and hot stone treatments. Among other things, it has an integrated heating, automatic shower, as well as MP3 player where you can listen to your favorite music during the treatment. The offer also includes products of the Italian company Nilo Beauty, which has been one of the leaders in production of massage tables, water beds and entire equipment for cosmetic and SPA centers for years.

NEOQI SPA CAPSULES

NeoQi SPA capsules are the ideal system of combining of hydro-fusion with vichy showers, aroma and chromo therapy with a very pleasant jacuzzi massage. NeoQi SPA capsules provide a feeling of complete relaxation, and balance the energies of body and water. Combinations of mud, herbs, aromatic oils steam and water provide perfect results and a remarkable feeling. Individualization of treatment ensures satisfaction to most demanding clients. Defined programs solve many problems in life of a modern man. NeoQi Spa systems are manufactured by modern European safety standards, and represent an ideal basis in your SPA offer.

FUNCTIONS IN NEOQUI SPA CAPSULES:

- IR SAUNA
- Steam sauna
- Vichy showers
- Aromatherapy
- Vibro-massage
- Chromotherapy

ICE ROOMS – Frigidaria

For start, we should mention that only most exclusive world SPA centers have this kind of wellness facility. Ice rooms are specially designed spaces with extremely low temperature of about -3C. Beneficial effects of large amplitude saunas with warm wellness contents combined with ice water are manifold, as many studies have shown. In Russia and the Scandinavian countries, these treatments have been present for centuries. After using sauna, people throw themselves in the snow to boost circulation, feel healthy, relaxed and re-generated.

MARCONIO cold rooms are design perfect facilities which include a technique that creates conditions of cold winter sites. The room is fitted with special system for R-snow production with capacity of 15 kg of snow per hour. What makes this system superior in contrast to the others is software that enables the production of snow to start already after only 120 seconds.

An integral part of the equipment of cold rooms is a powerful air conditioner – chiller that achieves the optimum temperature of about -5C to 0C.

The remainder of the interior is built after thermal and water-proof works in the style of mountain motifs, while the entire front is made of glass. Glass is a thermo cushion, filled with argon which provides excellent isolation. The interior can be made in cave style, too. For this look, we use artificial stone walls of superior quality that are extremely faithful copy of the real cave walls. They are resistant to moisture, water and low temperatures, to create the right ambience of an ice cave.

Optionally, ice rooms can be inserted by facilities like cold pools in the mosaic, or wellness ice makers – ice fountains.

Finally, try to imagine a pleasant climate of SPA center, high-temperature saunas, hamam moisture, and warmth of water in massage pools. And then, at some point your gaze stops on ice-covered room, full of snow with minus temperatures. In addition to the beneficial effects and functionality, MARCONIO ice rooms are definitely a perfect aesthetic moment in every wellness.

COLD POOLS

Low water temperature in the cold pools revitalizes and refreshes the user's body for a longer period of time. Your nervous system is experiencing intense stimulation, producing impulses with positive effects on heart, breathing, circulation and skin.

The cold pool next to the ice machine and cold SPA room is the third important content in any serious wellness when it comes to so-called cold block issue.

These pools are ideal for use after staying in sauna, or in other hot contents. This content is extremely popular with athletes, because it speeds up the recovery period and is good for injuries of various kinds.

The drafting process is similar to that of standard concrete pools, even the mosaic is commonly used in finishing. The key difference is that for continuous cooling of water are used serious systems of French company CIAT, which is a synonymous in the world of air conditioning. Chillers are also used for air and water cooling with power of 10-50kw that provide the ideal water temperature for cold pools.

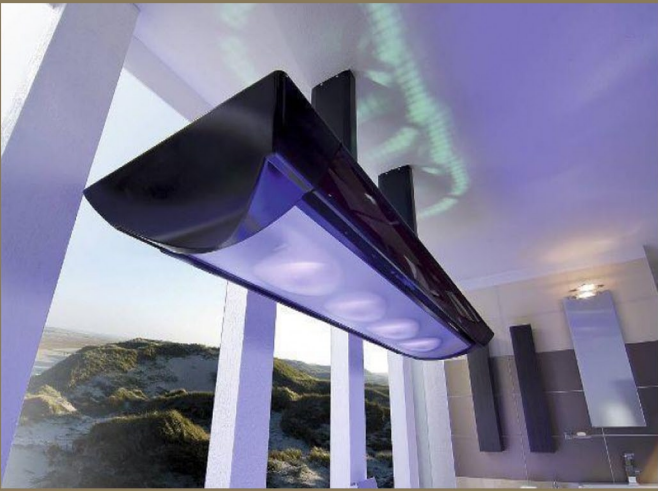

FITNESS EQUIPMENT – CYBEX

Cybex Company currently holds a market share of 25% in the US market, with a constant growth trend. Cybex is mainly engaged in manufacturing equipment for commercial purposes. MARCONIO has completed its offer with fitness equipment – Cybex, therefore now we can totally equip SPA, wellness and fitness centers. Cybex product lines include a full range of devices for strength and cardio equipment. Products are designed to mimic the natural movement of the body in such a way that any user, from professional athlete to the individual who is trained for the first time, can easily handle it. The company has 3 basic lines with over 150 different kinds of devices. The highest class is a series EAGLE which is rightly regarded the best strength line in the world, which is supported by the guarantee of a whopping 5 years. Cardio equipment includes treadmills, bikes, steppers and revolutionary ArcTrainer, the product which has been declared the best product of the year by Fitness Management for two consecutive years. CYBEX is the oldest US brand of fitness equipment, which has offices in 87 countries around the world. When ordering, it is important to know that the color of frames or upholstery can be chosen according to your wishes and in accordance with the interior of the fitness area. If you become part of the CYBEX team, you can count on our full support in every way, from 3D visualization solutions of your fitness area, through support of our fitness experts who would give you important tips and recommendations. MARCONIO, as a part of Cybex team can equip the hotel fitness centers, wellness centers and home fitness.

SOLARIA DR. KERN

In the occasion of browning, Sunsky solaria provide superior performance with its 4 high-pressure lamps, unique design, first class quality and good service. It is installed on the ceiling, so that it saves space and gives a sense of freedom to users. Sunsky is intended for both large wellness centers and small beauty salons. Distance of 140cm from the solarium to the users means a feeling of ease and freedom. In this way are circumvented two key drawbacks of conventional solarium, such as hygiene and a sense of claustrophobia. Sunsky solaria are made in two variants – 2 kw and 3,9kw. Solarium Sunsky 400 has 4 lamps at 400W, while the 800 series has 4 lamps at 800W.

SPA RELAX LOUNGERS

In order to complete our offer concerning equipping of SPA centers, MARCONIO has inserted relax loungers into its assortment. Relax loungers are an essential part of the relax area in wellness centers and space around the pool. Relax area is an important content in every wellness, because clients have to make a break between the use of various wellness facilities, freshen up and prepare for the next wellness treatment. Therefore comforts and conveniences of relax lounger are an imperative for us. MARCONIO offers relax loungers in several varieties, and consequently, there are several price categories. All woods used have to be thermo treated and resistant to moisture and water, while upholstery fabric has to be in the class of water-proof materials. Relax loungers are made of knitted rattan in several different models or thermo treated ash in case the client prefers natural materials. The most exclusive models are made of teak wood combined with stainless steel legs and a brace.

EXCLUSIVE WDT SYSTEMS

WDT, i.e. Werner - Dosiertechnik is a German company with a long tradition in the production of exclusive options for various wellness facilities. MARCONIO as their distributor recommends this option, especially if it is about luxurious wellnesses that want to create comparative advantage over competition.

FOAMDOS - device for foam production

The device is mounted in a steam bath. It is used for the production of massage foam. It is possible to dose the amount of foam. It is mounted in a technical room of a steam bath where from it is led by pipes below the massage table for treatments of mud peeling, etc...

SOLDOS SL-V3 - concept of marine climate for dry cabins

It is a nebulizer, which also has a function to create the effect of a marine climate, but in dry areas such as sauna, relaxation room, tepidarium of maximum floor area 35m2.

SOLDOS V2, V3 - concept of marine climate for steam cabins

These are nebulizers with tiny aerosol particles which create conditions of marine climate in the room. Soldus disperses sterile saline into the premises of maximum surface up to 20m2. Saline solution is situated in a tank which is in the form of a vacuum plastic bag, so that this prevents contamination of the contents. It is supplied with a disinfecting system and modern touch color display.

LUFTSTOSS - sprays a cloud of steam

Steam shower is a form of spraying steam over bath, i.e. users. The nozzles above the seats discharge air under pressure which pushes the steam from the upper zones and makes a stem blow on the users in the lower zone. An integral part of this system is a stainless steel tank with an air under pressure. The whole cycle is followed by appropriate audio-visual effects that give additional quality to this luxury option.

DUFTDOS - Aroma systems for dry rooms and steam baths (1-5 kinds of flavors)

Unit for aromatherapy rooms such as tepidarium, caldarium, infra cabin up to 20m². The system functions as a small compressor which blows air through aromatherapy concentrate, which is then transported into the room by 6 small hoses with stainless steel nozzles at its ends. A system can be set with 1-4 aroma containers and the desired one is selected by pressing a specific button. Insertion interval may be adjusted manually to 2,5, 5, 7,5 and 10 minutes.

SAUNA PLUS 8 - aroma system for saunas

It is aromatization of a sauna in form of dosing system which automatically disperses essences of various aromas and water over sauna's heater. It has 3 operating modes: cyclical, via timer and manual push of a button, with the possibility of adjusting a favorite program of aromatization. This option is controlled via a 3.2 " touch color display and spraying can be combined with sound and light effects.

RAXUL BATH V2 - Control system for Raxul steam bath

The system is provided for Raxul steam cabins. The cycle consists of three steps: treatment, steam and washing off. It is an automated system that combines effective lighting, with function of steam bath and automatic washing away of Raxul mud after treatment.

FOOT BATH - automated system for Kneipp baths

Kneipp system of automated treatment is activated by pressing a button. The cycle starts automatically by filling of the bath tubs, until it is filled to the required level when the charge is terminated. In the next step, automatically begins aero feet massage, after which the tub gets emptied. The cycle ends with automatic disinfection of baths and systems with chlorine.

EXPERIENCE SHOWER - Multisenzualni aroma tuševi

Ove vrste tuševa predstavljaju kao sto im ime kaže-tuševe doživljaja i iznenađenja. Poseduju različite tipove atrakcija: trop-sku kišu, maglu, rosu, i u kombinaciji sa zvukom, aromama i različitim svetlosnim efektima stvaraju jedinstven i nezaboravan doživljaj. Sastavni su deo svih modernih i ekskluzivnih spa centara. Postoji više funkcionalnih sistema: Ponoćna kiša, Karipska oluja, Sibirska noć, Kiše Nijagare, Tuš magle... Svaki sistem je automatizovan, i sastoji se od plafonskog tuša i kontrolne table sa efektima.

WELLNESS SUIT CONCEPT
by MARCONIO

Following the international trends of luxurious furnishings of large hotel chains, we came up with the idea to make the concept of wellness suites, where the apartment would have well-ness facilities of a professional SPA center, but also the pri- vacy of an apartment.

Conventional hotel rooms and apartments can be easily con- verted into a wellness oasis designed for demanding clients who want privacy in the use of wellness. The hotel, service tourism and technologies are characterized by a high level of innovation and development, therefore desires and needs of the clients follow this development. Clients are looking for pri- vacy and not interfering with other guests, waiting for someone to get out so they can enter sauna and other wellness facilities. Before all, clients want to be sure of hygiene, which is the main problem of wellness centers. In private SPA suites hygiene will be at the highest level. Research has shown that the rooms with innovative technologies are the most expensive in terms of smart and easy handling facilities in the apartment. Taking this trend into account, MARCONIO wellness rooms would have the ability to manage all the products from one place. When a guest chooses wellness apartment, he gets the ability to install an application to his mobile device through which he would be able to set all important parameters, such as wellness facilities and other functions.

Your potential clients can have all this in the new concept of wellness suites which provides total wellness 0-24.

Exclusivity and individual approach that wellness suites provide are something clients are willing to pay for. Therefore, they can be easier repaid than conventional bulky wellness centers. The hotel would have a unique offer, which would give added value to the entire complex.

SPA suites are designed to help clients set off on a journey of relaxation, detoxify themselves with loved ones in a completely VIP variant with the disposal of wellness facilities 0-24, con- trolled easily over new technologies.

Marconio can encircle the entire story and equip such an apartment, from conceptual design, through execution of con- struction and installation works, to making them the wellness facilities, and then implement new technology and program- ming of completely unique applications.

Equipping of the apartment can be on a turnkey basis.

MARCONIO is currently building two such wellness suites which are a combination of luxury, innovation, design and wellness benefits. Therefore our future clients can be convinced that our vision of future hotel rooms have a bright future.

PRIVATE WELLNESS IN YOUR HOME

Surely you have always dreamed about your personal wellness center within your home with modern design and materials, professional performance, all made to fit your space.

The Marconio Company Whirlpool SPA can realize all your wishes.

For those who want to create their own private spa area within their home to enjoy in with family and close friends, MARCONIO can provide an ideal solution. Our professional expert team would give you ideas and advice, as well as all technical support to get your own SPA center in a corner of your home.

The advantage of home wellness is that in the space of only few square meters you can have all the necessary facilities, so you do not have to waste time and money going to the public SPA. Also, your intimacy is shared with your loved ones only, while hygiene is at the highest level.

The most common variant is combining of basic wellness facilities such as sauna, steam bath, aroma shower and massage pool. These four contents can be installed in the space of just 15m2. All relevant SPA products would be at your fingertips whenever you want.

However, before you start thinking about anything, our sugges- tion is to visit MARCONIO Wellness Showroom. There are two SPA suites where you can see and also try out all the essential wellness products from MARCONIO range.

Marconio offers a wide range of equipment and materials for its clients. Suppliers are the most famous companies in the wellness segment. We are able to offer that equipment for private smaller units, as well as professional equipment made from the finest materials for public SPA centers.

Uniplatte ploce

Perhaps the most important material in the wellness industry is paneling for saunas and boards for sauna's benches. In its range, MARCONIO offers only the best types of wood, which can successfully stand sauna's harsh temperatures. Aesthetic and prices can meet various requirements; therefore in our basic offer we have class A Finnish white pine without knots and linden, which is mostly widespread in Russia. More luxurious variety is red cedar originating in Canada, which has the property to drain natural flavors under high temperatures or North African abachi wood. Beside these, we also offer: hemlock, aspen and aider. The finest wood for benches is abachi because it is airy, so it does not get heated nor absorbs moisture and sweat, thus remains in good shape for years.

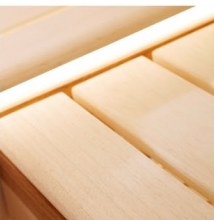

Also, MARCONIO is able to offer several variants of finishing. We offer a stone mosaic, glass mosaic and the finest Italian granite mosaic **Appiani**.

In the construction of salt rooms we use Dead Sea salt and Himalayan salt blocks imported from Pakistan. Massage tables are manufactured by a German company **Hilpert** whose products are handicraft made with great dedication.

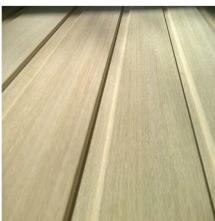

Another German company responsible for the most exclusive tepidaria and lounge chairs in the world. **Sommerhuber** Company and its products reflect the luxury of a wellness center and a matter of prestige, a real jewel that enriches your space.

SPA capsules with Vichy showers options and numerous their functions, necessary in any serious cosmetic salon are produced by a new Estonian company **NeoQi**, which has been named one of the fastest growing companies in the wellness segment.

Fitness products are of the US Company **Cybox**, which has a 25% market share in sales of fitness equipment for gyms, hotels and SPA fitness centers. MARCONIO closely cooperates with this company which gives 3D floor plan with its products, as well as an unbelievable warranty of up to 7 years on their products. MARCONIO has a service team that can react in shortest period possible towards all these suppliers. In case there is demand for something which is not in our assortment range, you should notify us on that and we will get in contact with the suppliers and fulfill your wishes.
